COUNTY HORSE SHOW BABY CARRIED IN A VALUE. PREPARING FOR WAR

The Queer Baggage of an Elderi Male Passenger on an lowa Railway.

"Carrying a baby in a grip is a new wrinkle on me," remarked an old-time palace car conductor at a Chicago hatel the other night. "It was away out in western Iowa," he continued, "that the lucident I am about to relate happened. I had two porters in my car. One was the regular porter, who is familiar with the traveling public, and the other darky was just being broken in. He was on the first run and wanted to eatch on to the business. Well, some where west of Marshalltown an elderly fled Capetown rumor, to-day, that the man climbed on the sleeper. He had Boers have delivered another mossage to two grips, one fat one, the other a the British High Commissioner, Sir Al mere band grip. He remarked to the porter to handle the grips very carefuly and to keep them upright.

apartment and ordered his grips placed in his berth. It so happened that the new porter got hold of them and l can never understand how it happened that there wasn't a tragedy on that car, for he took the fat grip and gave it a big toas, landing it up to the top berth. There wasn't a sound. "Pretty soon the man came out of

the smoker and proceeded to retire. He made considerable fuss about the rough way in which his grips had been hundled and the finding of the large one upstairs. In the night some time a baby's voice was heard. The little one erted several times, but always quieted down. The sound was traced to the berth of the man who had been fussy about his grips. Next morning he did not get up and remained in the berth until the train reached Chicago.

"When he left the car the big grip was as heavy as ever and the porter received the same precentions about careful handling. I managed to get around in front of him and asked him if the baby was all right. He looked the most indifferent way that it was all right, but had spent a rather restless night. He said he always carried it in the grip to avoid appearance, taking along several bottles of milk when on a long trip." Decided On by the Council of Ministers

WHY THE SALLORS WENT DRY.

Their Tub-Loving Captain Bad t Have His Fresh-Water Bath Every Morning.

Louis, an old ses dog from Austria, who has sailed the briny deep from Baffin's bay to No Man's Land, enjoys comparing his present position in the American marine se wice to that he once occupied when sailing in an East Indianman from Liverpool to Calcutta, says the New York Sun. The vessel had been becalmed and the water supply ran short during a terrible hot speil The crew had to exist on moldy sea bis cuits, while the captain, a big bully of an Englishman, lived in luxury. The crew did not object to this until one lay, when every man was almost pros traced by the heat and lack of sufficient water, they discovered that the captain, knowing the sufferings of the men, had been taking baths daily in fresh water in a tub in his cabin. Almost an oper mutiny broke out, and a squad of the tars, headed by Louis, was sent aft to are the captain about getting some more drinking water.

He told the captain frankly that they knew of his taking baths daily in his cabin in fresh water, and that every instinct of humanity dictated that he dacity" of the men.

That evening he gave each man an ttra half pint of water, but he had a fresh water bath each morning, nevertheless.

Beloit, Wis., leads the world in the number of gas engines it manufactures One firm turns out 100 a week, and an other has a capacity almost as large to Mr. Bernard, of New York, for \$16. Both concerns are enlarging their plants. A Philadelphia company formerly held the record. Beloit also leads in having the greatest number It is reported in Port Jervis that the of skilled artisans in proportion to its properties were bought for the Monti-population, which is 10,000, and particskilled workers in Iron. An interesting fact in connection with the big fac in wages each month an average of ame dollars to every man, woman and child in the city. - A Beloit company claims to have the finest ladies' shoes in the world, and Mrs. McKinley, at least, is convinced of the truth of this claim, as she has her footwear made in that city.

Few Printers in Jail. The first Australian newspaper, the Sydney Gazette, was published on March 5, 1803, 15 years after the rise of the colony. The delay was caused through there being no printers among the convicts, who represented every profession, including the legal. The plant was brought out in the first fleet. but it could not be used until the authorities caught a compositor. It has been suggested by a writer who has suffered at the bands of compositors that they keep all their crimes for the composing room. For Ladies' Hats.

BOERS MAY ATTACK AT ONCE

Not Ready for War - Cabinet Council Not Yet Cailed. BY AMERICATED PERS.

LONDON, Sept. 19 .- There is an unveri-

WASHINGTON, Sept 19-The impe rial Chinese government, through its unnister kere, Mr Wu Ting Fang, has lodged with the state department an emplotic protest against the unitary order of Gen eral Otta excluding Chinese from the Philippines. Neither the state depart ment nor the Chinese legation will give any information concerning the protes, but from entirely reliable quarters it is fearned that it insists that General Otic action is contrary to international law in violation of existing treath's and in our plete disregard of the friendly relations which have been so long maintained be tween the two countries Minister Wu called at the state depart

ment last Friday, and it is believed be-

The matter was promptly brought to the attention of the president as the protest was of such a character as to give the subject an into a tional aspect con ederably beyond the purely military questions involved. It is said that Chian nominate out that she has welcomed the recent advent of the United States int the affairs of the for east and has hope that this step would prove a further band and would extend the relations between the two countries particularly in their fullest co operation of the navy in any neighboring possessions. Furthermore, is understood that among the specific points of protest submitted by the Chi nese government is one to the effect that such an order is a departure from the announced purpose of the president of the United States to maintain the pres name station. The Spa hards discovered that it afforded advantages for such a status of afforce in the Philippine and the Phili until congress had determined a perma

NEW BATTLESHIPS.

The Plans Provide For Great Speed and Lurge Coal Capacity,

WASHINGTON, Sept. 19 - The naval engineers have projected plans for the new battleships which if adopted will provide an entirely novel type for the navy. The purpose is to have these ships combine in themselves the good qualities of hattleships and aimoned cruisers. The aim will be to have the highest possible speed for such ships in this case 20 knots

This will be attained by the use of tri ple screws two small side screws for use in ordinary cruising and a hig central seres to add to the propulsive force in case high spaced is needed. The ships would be of 14,000 or 15,000 tons dis placement and, with seven mehes of the latest armor, would be almost as string in defense as a regular battleship ibc conf capacity would be about 2000 to in sufficient at ordinary crusing speed to carry the ship 10,000 or 15,000 miles
